

Welcome to the Analytics track

OHDSI-UK 2026 Training

2026-09-17

Welcome to the OHDSI-UK training

Aims of the analytics track

By the end of the training:

- Be able to conduct descriptive analyses using R with data in the OMOP CDM format
- Understand how to approach writing bespoke code for complex studies
- Know where to look for help

What to expect

What to expect

- Quarto presentations - most presentations correspond to an R package that works with data in the OMOP CDM format.
- “Your Turn” exercises - during presentations where you can practice using the package (solutions will be on the next slide, but first try without looking at these!)
- General practical - time to apply what you have learned during the training.

Post-It notes

- Green - all good, no code currently running
- Yellow - code running
- Red - help me!

Set up

Download the needed data

- Contains the datasets you will need for today
- Open the *Analytics track* project with RStudio
- Run the **Setup.R** script in the *Your turn* folder
- Run the **createDatabases.R** script in the *Databases* folder
- Copy the databases to the *Back up* folder

Schedule

Time	Session
10:30 - 13:00	• Creating a CDM reference with CDMConnector • Characterise the OMOP CDM instance with OmopSketch • Writing custom queries using PatientProfiles and dbplyr
13:00 - 14:00	<i>Lunch break (Room D)</i>
14:00 - 16:30	• Creating cohorts using CohortConstructor • Characterise cohorts using CohortCharacteristics • Evaluating cohorts using PhenotypeR

Introductions

- What's your name?
- Where do you work? What is your role?
- Have you used R before?
- Have you worked with OMOP CDM data before?
- What do you want to get from this training?

Materials

All training materials are available from the **presentations** and **downloadable PDFs** on this website.
