

Final remarks

OHDSI-UK 2026 Training

2026-09-17

What We Promised

What We Promised

By the end of the week:

- Be able to conduct descriptive analyses using R with data in the OMOP CDM format
- Understand how to approach writing bespoke code for complex studies
- Know where to look for help

Feedback

We'd love to hear your thoughts!

Please take a moment to fill out the feedback form — especially the questions related to the **Analytics track**.

All feedback is welcome — both positive and critical.

We hope the course met your expectations and helped you grow your skills.

Want more?

Each of the packages we covered this week has its own website with vignettes and documentation to help you go further.

Packages summary

You can explore all the packages we've discussed — and more — on our website.

Stay connected

Want updates on new packages, methods, and publications?

Subscribe to our monthly newsletter — just one brief update on the 1st of each month:

 **Newsletter**

Have questions or suggestions? Please open a GitHub issue or email us. We welcome contributions to all packages hosted in the **OHDSI** organisation.

Bonus resource

We've put together a book that complements this week's course:

👉 **Tidy R Programming with OMOP**

If you find it helpful, please ★ the repository on GitHub — and feel free to open an issue if anything's unclear. Your feedback helps us improve.

Youtube channel

We have a YouTube channel with some videos that might be interesting:

 **YouTube channel**

Course materials

All morning session materials will be shared with you at the end of the course.

The afternoon session materials will remain available online for **two weeks** after the course ends. After that, the website will be taken down and the repository made private. Please download any slides or resources you'd like to keep before then.

Thanks to All Speakers

Thanks!

Thank you all for this amazing week 😊

We hope to see you again soon!
